

## Firm to Handle International Breach of Contract Claims

In conjunction with our legal partners in Asia, our firm handles civil litigation on behalf of foreign private entity and governmental. Typically these cases involve Asian corporations or government bodies seeking to enforce commercial contracts against businesses in the U. S. While these disputes are generally focused upon breaches of contract, they may also implicate tort claims (*e.g.* for fraud or negligent misrepresentation as well as RICO violations) and injunctive relief.

International litigation involves issues not always present in litigation between solely domestic parties. Our firm pays careful attention to these unique matters, before and after a case is commenced.
